

Rudresh Veerkhare

Senior Analyst, Deutsche India

 rudresh.net @ veerkhare@rudresh@gmail.com  RudreshVeerkhare  rudresh-veerkhare  Google Scholar

Research Interests

I am interested in creating robust and dependable **Document Understanding** systems that facilitate data extraction and analysis from multi-modal documents, further supporting data-driven machine learning.

- > **Multimodal Document Processing:** Developing techniques for structured data extraction that encompass textual, visual, and spatial information.
- > **Document Analysis utilizing Generative AI:** Employing Multimodal Document Processing to empower Generative AI, like Large Language Models, in building robust and reliable Data Analysis Pipelines.

Education

May 2022	Sardar Patel Institute of Technology	Mumbai, India
Aug 2018	B.Tech, Computer Engineering CGPA: 9.63/10	

Publications

- [1] **HRescue: A Modern ML approach for Employee Attrition Prediction** [
Rudresh Veerkhare*, Parshwa Shah*, Jiten Sidhpura*, Sudhir Dhage (* = Equal Contribution)
Springer Proceedings in Mathematics & Statistics, vol 401. Springer, Cham. [ICMLBDA 2022]
- [2] **FedSpam: Privacy Preserving SMS Spam Prediction** [
Jiten Sidhpura*, Parshwa Shah*, Rudresh Veerkhare*, Anand Godbole (* = Equal Contribution)
Communications in Computer and Information Science, vol 1793. Springer, Singapore. [ICONIP 2022]
- [3] **Face To BMI: A Deep Learning Based Approach for Computing BMI from Face** [
Jiten Sidhpura*, Rudresh Veerkhare*, Parshwa Shah*, Surekha Dholay (* = Equal Contribution)
In Proceedings of ICITIIT, Kottayam, India, 2022, pp. 1-6. IEEE [ICITIIT 2022]

Experience

Present	Deutsche India Chief Technology Office, TDI	Pune, India
Jul 2022	Senior Analyst I'm working on OCR and Document Understanding to streamline document processing. My work spanned Custom Document Entity Extraction, Smart Document Splitting, LLM-aided Contract Drafting , and innovative software automations like Automated Vulnerability Scanning . I have also worked on the adaptation of Document AI within the organization and have experience in Software Governance .	
Jul 2021	Deutsche India Chief Technology Office, TDI	Pune, India
Jun 2021	Technology Analyst Intern As part of the research project, I worked on Optical Character Recognition, which encompassed tasks such as Table Detection, Table Structure Recognition from scanned documents, Signature Extraction, Custom Named Entity Recognition , and Intelligent Character Recognition .	
Apr 2021	Sardar Patel Institute of Technology	Mumbai, India
Jan 2021	Research Assistant Advisor: Prof. Pramod Bide I conducted research in the field of Cross Event Detection and Topic Evolution Mining from Social Media Posts, developing innovative algorithms for Cross Event Detection and Sub-Topic Evolution through the application of statistical NLP techniques.	

Awards

- > **India Excellence Award (Deutsche Bank, Feb 2023)** Award granted to only **280 out of 17000** (1.65%).
- > **Best Graduation Project Exhibition Award (SPIT Mumbai, Apr 2022)** Awarded **1st prize** for project **FedSpam**.

Research Projects

FedSpam: Privacy Preserving SMS Spam Detection (Team Size: 3)

Federated Learning, NLP, Edge Computing

- › FedSpam is an edge computing application which leverages **Federated ML** to **preserve the user data privacy** while using the advanced data-driven ML solutions for spam detection.

CustomXGBoost: XGBoost Implementation with Optimizers (Solo) [[in](#) | [🔗](#)]

Gradient Boosting, Optimizers

- › XGBoost **Implementation from scratch** where I've modified the **gradient boosting** to utilize optimizers such as **ADAM** and **RMSProp**.

Arbit: A Decentralized Crypto Exchange Arbitrage System (Solo)

Linear Algebra & Graphs, Blockchain Smart Contracts

- › Developed an efficient algorithm with **O(1)** time complexity for detecting **Nth order arbitrage** opportunity in Decentralized Crypto Exchanges (DeX).
- › Utilized graphs and linear algebra in the derivation process.
- › Implemented the system on the Cloud with optimal regions for low network latency, enabling continuous real-time blockchain monitoring and swift execution of profitable arbitrage transactions.
- › Created a profitable personal project, generating approximately **\$10,000** in cryptocurrency in early 2022.

HRescue: A Modern ML approach for Employee Attrition Prediction (Team Size: 3)

Gradient Boosting, Explainable AI, Data Augmentations

- › Numerous attrition prediction methods have been developed in the past. However, This approach focuses on **interpretability** of ML models for sensitive employee attrition decisions and **outperforms prior methods** while addressing **data imbalance**.

Face To BMI: A Deep Learning Based Approach for Computing BMI from Face (Team Size: 3)

Computer Vision, Transfer Learning, Discriminative Learning

- › Developed a BMI prediction model from facial images using **transfer learning** on deep convolution networks, implementing **discriminative learning** to train the last few layers with varying learning rates for further model fine-tuning.
- › Used **Tensor Processing Unit** for training Deep Learning models.

Software Projects

Catalyst (Solo) [[🔗](#) | [📄](#) | [in](#)]

Open Source, Node js, VSCode Extension

- › Catalyst is a VS code Extension to accelerate the process of solving problems on Codeforces. It has **3000+ installed user** and **12000+ downloads**

ReactPy (Solo) [[🔗](#) | [in](#)]

Open Source, Web Python, Algorithm

- › ReactPy is a implementation of React in Python using Brython. It's a **from scratch implementation** of **React Fiber**, along with **diffing and Virtual DOM** in Python 3.

Numras (Solo) [[🔗](#)]

Open Source, Numpy, Neural Networks

- › A **mini-framework** completely **implemented from scratch** using Numpy. Its api is similar to **Keras**. All of the operations like forward pass, backward pass and optimizations are carried mathematically from scratch.

Recruitment Assisting Platform (Team Size: 4) [[🔗](#)]

Data Mining, Data Visualization

- › Used **Latent Dirichlet Allocation (LDA)** for grouping candidates based on the Resume.

Elliptical Curve Diffie Hellman (Solo) [[🔗](#)]

Cryptography, Algorithms

- › Implemented **Elliptical Curve Diffie Hellman Key Exchange algorithm**, from scratch.

Technical Skill

Programming	Python 3, Java, C, C++, JavaScript, Typescript, Solidity, PowerShell, Shell Script
Frameworks & Libraries	PyTorch, Numpy, Keras, Tensorflow, Scikit-Learn, Huggingface, LangChain, ReactJS, NextJS, Django, Flask, FastAPI, SpringBoot

Relevant Course Work

• Artificial Intelligence and Soft Computing • Fundamentals of Computational Intelligence • Machine Learning
• Big Data Analytics • Data Science • Data Warehouse Mining • Human Machine Interaction • Operating Systems
• Discrete Structure and Graph Theory • Theoretical Computer Science • Advanced Data Structures • Distributed Systems
• Digital Signal Processing • Database Management Systems • Design and Analysis of Algorithms • Engineering and Applied Mathematics

Hackathons

- > **Predicting House Prices In Bengaluru (Machine Hack, Feb 2021)** Ranked **6th** out of 403 submissions (Top 1.4%).
- > **Predict The Data Scientists Salary In India (Machine Hack, July 2020)** Ranked **3rd** out of 192 submissions (Top 1.5%).
- > **Predict The Price Of Books (Machine Hack, July 2020)** Ranked **46th** out of 847 submissions (Top 5%).
- > **Video Game Sales Prediction (Machine Hack, June 2020)** Ranked **24th** out of 231 submissions (Top 10%).
- > **Computer Vision Classic (Machine Hack, July 2020)** Ranked **10th** out of 87 submissions (Top 11%).
- > **JanataHack: Machine Learning for IoT (Analytics Vidya, May 2020)** Ranked **28th** out of 202 submissions (Top 14%).
- > **KJSCE HACK 6.0 (KJSCE Mumbai, Apr 2022)** Won the Filecoin Track Prize of **\$260**.
- > **SPIT Hackathon 2021 (SPIT Mumbai, Feb 2021)** Won the Best Hack Build on Ethereum + Matic Prize of **\$200**.
- > **HackNITR 3.0 (NIT Rourkela, Oct 2021)** Won the Best Dapp Built on Celo Prize of **\$265**.

Volunteering

40+ Hours of CSR, Deutsche India	2022 - Present
<ul style="list-style-type: none">> Volunteered for development of applications to spread awareness about Mental Health.> Volunteered for School Kit Assembly and Distribution for underprivileged children.> Volunteered for crafting of environment friendly paper bags.	
Scikit Learn Open Source Contribution [🔗 📄]	Nov 2022
<ul style="list-style-type: none">> Implemented an Enhancements Proposal for allowing Minkowski distance with $0 < p < 1$.	
10+ Hours of SEVA, Mumbai	2019 - 2020
<ul style="list-style-type: none">> Volunteered for teaching Maths and Science to high school underprivileged children.> Volunteered for Mumbai's Beach Cleaning.
